(54) Title: COMBINATION THERAPY WITH GLATIRAMER ACETATE AND MITOXANTRONE FOR THE TREATMENT OF MULTIPLE SCLEROSIS

(57) Abstract: The subject invention provides a method of treating a subject afflicted with a form of multiple sclerosis comprising periodically administering to the subject an amount of glatiramer acetate and an amount of mitoxantrone, wherein the amounts when taken together are effective to alleviate a symptom of the form of multiple sclerosis in the subject so as to thereby treat the subject. The subject invention also provides a package comprising glatiramer acetate, mitoxantrone and instructions for use of the together to alleviate a symptom of a form of multiple sclerosis in a subject. Additionally, the subject invention provides a pharmaceutical composition comprising an amount of glatiramer acetate and an amount of mitoxantrone, wherein the amounts when taken together are effective to alleviate a symptom of a form of multiple sclerosis in a subject. The subject invention further provides a pharmaceutical combination comprising separate dosage forms of an amount of glatiramer acetate and an amount of mitoxantrone, which combination is useful to alleviate a symptom of a form of multiple sclerosis in a subject.
